2. Reception Officer, EEI.

Linking Adhaar with ER Data in UIDAI and NPR States
Note for the Commission's Meeting
(21.05.2015)

- The Commission has launched NERPAP on 03.03.2015.
- The core objective of the Programme is linking of Aadhaar with EPIC database.
- On the basis of feedback received from CEOs during Zonal Review Meetings, it emerged that NPR covered States (namely, Arunachal Pradesh, Assam, D&NH, J&K, Lakshadweep, Manipur, Meghalaya, Mizoram, Nagaland, Odisha, Tamilnadu and West Bengal) are lagging behind the states covered by UIDAI in Aadhaar coverage.
- The Commission, in its review meeting held on 07.05.2015 on ER matters expressed its concern over slow progress of programme in these states.
- Accordingly, it was decided to hold a meeting with RGI, DG, UIDAI, DG, C-DAC, DG, NIC, CMD, BSNL and CEOs of certain NPR states (Arunachal Pradesh, Manipur, Meghalaya, Odisha, Tamilnadu and West Bengal) on 21.05.2015.
- <u>Agenda of the Meeting –</u>
  1. Issues related to **UIDAI** –
     a) Agreement – an agreement has been signed between UIDAI and Election Commission. That agreement has been submitted on file, in which LA(SKM) has pointed out that an agreement cannot be entered in to between two offices working under President of India. He has suggested that maximum, an MOU can be signed between two, such offices.
     b) MOU with CSC- as informed by CSC, UIDAI is insisting that the Commission has to sign a separate MOU with CSC for purpose of authentication of Adhaar data.
     c) Methodology to share the data – UIDAI has not supplied fully the web API which allows access to Adhaar data base through NVSP portal. This application is required for EROs to carry out seeding of Adhaar number in electoral data base.
     d) Biometrics for overseas Indian electors – the issue was discussed on 19.05.2015 in the meeting of the Committee on e-voting. As Adhaar is not issued to the overseas Indian electors, their biometrics have to be collected separately. It is for discussion whether UIDAI can take up the task of collection of biometrics of overseas Indian electors.
  2. Issues related with **RGI** –
     a) Poor enrolment in NPR States.
     b) Insufficient manpower and equipments to agencies engaged by RGI.
     c) Non-issue of BME receipts and delay in distribution of Adhaar due to incomplete address.
     e) Delay in supply of data to CEOs

3. Issues related to **BSNL** –
   a) Poor network in North Eastern States.
   b) ECI – NET – a proposal for development of ECI NET on pattern of NIC NET/RAILTEL is under consideration. It is for discussion as to how BSNL can assist in development of ECI NET.

• **Issues raised by NPR States** – Besides, general concerns about less enrolment, poor net connectivity and adverse weather conditions, specific issues raised by respective CEOs are summarized as below:

(1) Arunachal Pradesh:-
   (i) BME has not started in 2 districts.
   (ii) BME work has been suspended temporarily in Upper Subansiri and Lower Subansiri districts.
   (iii) Vendors are very slow.
   (iv) Manpower and equipments are not sufficient.
   (v) Frequent stoppage of BME work due to irregularity in payment of wages/salary to the operators by the vendors.
   (vi) The permanent centers have not yet been established.
   (vii) Atleast one permanent BME centre needs to be opened in each of the AERO Hqs and ERO Hqs.
   (viii) Many Aadhaar cards are getting piled up in post offices due to incomplete address.
   (ix) Non issue of BME receipts has aggravated this and the net result is delay in collection of Aadhaar Nos.

(2) Assam:-
   (i) The Aadhaar Number collection work will mainly start in Assam after publication of National Register of Citizens being prepared under Citizenship Act-1955.
   (ii) Presently, preparation work of "draft National Register of Citizens, is under way. It will be finally published in January, 2016.
   (iii) The Aadhaar number seeding work may be taken up after January, 2016 with full force, in parallel with BME collection process under NPR.
   (iv) Presently, on pilot basis Aadhaar number generation work under NPR is going on in the Districts of Sonitpur (Tezpur), Nagaon and Golaghat. In these districts DEOs have been instructed to collect EPIC number in KYR form at BM collection centre of all such persons whose names appear in Electoral Rolls.
   (v) Total number of Aadhaar issued in the state is 1,48,349 only.
   (vi) CEO office is not receiving information on progress of EPIC data collected during BME collection process from RGI.

(3) Manipur:-

    (i)   Coverage/capturing of BME is very slow because very less number of BME teams (only one BME team for 7 (Seven) Assembly Constituencies).

    (ii)   Need of having more number of mobile BME teams in hill districts.

    (iii)   Capturing BME is entrusted to 2(two) agencies MANITRON AND INMEDIA. Progress in BME coverage in districts entrusted to INMEDIA is very poor. People have complained that INMEDIA officials are not easily available in the field.

    (iv)   In some cases, the number given in the Aadhaar card does not tally with the number reflected in the RGI data.

    (v)   Necessary action to ensure timely distribution of the Aadhaar cards generated to the public so that public may submit their Aadhaar No. in time for feeding and seeding.

    (vi)   C-DAC may be requested to make the data entered through NVSP available to the State for cross checking.

    (vii)   Updated RGI data in respect of Manipur may be made available to the State for feeding and seeding Aadhaar No.

(4) Meghalaya:-

    (i)   Biometric enrolment conducted from 20.06.2013 in 3 out of 27 wards of Shillong Municipality but process was discontinued on 25.07.2013 due to opposition from some NGOs/social organizations.

    (ii)   Enrolment of about 9000 persons out of 16000 could be made during the period. .

    (iii)   Law and order situation in Garo Hills and Prevailing weather conditions may cause obstructions in field exercise.

    (iv)   First level intensive campaign planned from 15th June, 2015 to 30th November, 2015.

(5) Mizoram:-

    (i)   Slow pace of Aadhaar registration

    (ii)   Delay in sending of Aadhaar cards to the applicants.

    (iii)   Aadhaar registration in Mizoram is not up to the mark.

    (iv)   So many errors in Aadhaar cards.

(6) Nagaland:-

    (i)   Unstable net connection in most of the districts.

    (ii)   Shortage of manpower.

    (iii)   No DIO posted in Zunheboto district since 2013.

(7) Odisha:-

    (i)   Additional Permanent Enrolment Centres (PECs) are required especially in the districts (of Khurdha, Nuapada, Koraput, Sundargarh, Keonjhar, Balasore, Bhadrak, Rayagada and Kandhamal), where the enrolment is less.

    (ii)   Necessary timely action is to be taken for correction of Aadhaar cards by 30th June, 2015.

(8) Tamilnadu:-

    (i)   522 numbers of PECs run by BEL are grossly insufficient to handle the task on hand. UIDAI may assist in upgrading the infrastructure to capture bio-metrics by making a little investment.

    (ii)   The contract period of BEL is going to end in November, 2015. Therefore, either RGI may appoint TNeGA & TACTV as their System Integrator to capture biometrics or UIDAI may give the enrolment agency status to TNeGA & TACTV.

    (iii) To facilitate easy retrieval of NPR demographic data of any citizen at any PEC, online availability of NPR database and connectivity may be given to all PECs.

    (iv) RGI to take a decision in this regard to establish real-time connectivity to avoid duplication and also to permit TNeGA and TACTV in capturing of bio-metrics. Online connectivity will reduce the lead time in transfer of biometric data from PECs to NPR server.

(9) West Bengal:-

    (i)   After repeated persuasion, only in last week they have received the data from RGI.

    (ii)   The data contains the fields namely; (i) TIN, (ii) Full name, (iii) Gender, (iv) Date of Birth, (v) Father's name, (vi) Mother's Name, (vii) Address line 1, (viii) Address line 2, (ix) Address line 3, (x) Address line 4, (xi) Address line 5, (xii) Pin code, (xiii) UID and (xiv) EPIC No only. The data does not contain the Enumeration Block (EB) code. Without the EB, its not possible to correlate with the Block and Polling Station.

    (iii) The agency engaged for collection of Aadhaar number at the district level does have the EB wise complete Aadhaar database. (1 EB = contains around 250 household, which is >= one Polling Stations).

    (iv) EPIC data is only 11.46% in total record.

*****

Linking Aadhaar with ER Data in UIDAI and NPR States
Issues and Challanges

Introduction

- The Commission has launched NERPAP on 03.03.2015.
- The core objective of the Programme is purification and authentication of electoral roll in India.
- Linking of Aadhaar with EPIC database is a major component of authentication of EPIC details of elector.
- States and UTs are divided among the organizations of UIDAI and RGI to collect the Aadhaar details of residents.
- There are some difficulties being faced by States and UTs in respect of collection, feeding and seeding of the Aadhaar data.

Feedback from the States

- On the basis of feedback received from CEOs during Zonal Review Meetings, it has emerged that the NPR covered States (namely, Arunachal Pradesh, Assam, D&NH, J&K, Lakshadweep, Manipur, Meghalaya, Mizoram, Nagaland, Odisha, Tamilnadu and West Bengal) are lagging behind the states covered by UIDAI in Aadhaar coverage.
- The Commission, in its review meeting held on 07.05.2015 on ER matters expressed its concern over slow progress of programme in these states.
- Accordingly, it was decided to hold a meeting with RGI, DG, UIDAI, DG, C-DAC, DG, NIC, CMD, BSNL and CEOs of certain NPR states (Arunachal Pradesh, Manipur, Meghalaya, Odisha, Tamilnadu and West Bengal) for a mid-term review of NERPAP on 21.05.2015.

Linking Adhaar with ER Data in UIDAI and NPR States

Agenda of the Meeting —

- Issues related to UIDAI
- Issues related with RGI
- Issues related to BSNL
- Issues raised by NPR States
- Any Other issues with permission

Issues related with UAIDAI

- Methodology to share the data – UIDAI has not supplied fully the web API which allows access to Adhaar data base through NVSP portal. This application is required for EROs to carry out seeding of Adhaar number in electoral data base.
- Agreement – an agreement has been signed between UIDAI and Election Commission. That agreement has been submitted on file, in which LA(SKM) has pointed out that an agreement cannot be entered in to between two offices working under President of India. He has suggested that maximum, an MOU can be signed between two such offices.
- MOU with CSC- as informed by CSC, UIDAI is insisting that the Commission has to sign a separate MOU with CSC for purpose of authentication of Adhaar data.

Background–About Electoral Roll

- ERMS so far was not a Centralized Database
  - Multiple databases
  - Incomplete data
  - Poor or missing data validations
  - Poor data management
  - Missing structured monitoring of the process
  - Missing process audit
- Creation of National ERMS using IT is the solution
- NERPAP was launched to take care of the above

6

3

Background -IT Methodology

- Error identification tool
  - permits generation of Error reports.
  - Error reports are categorized
  - These are generated part wise
- These reports are used for field verification
- After field verification necessary modifications are effected to the database
- Should be used periodically
- The cycle initiated should be completed

7

Issues where UIDAI support needed

- Agreement – an agreement has been signed between UIDAI and Election Commission. That agreement has been submitted on file, in which LA(SKM) has pointed out that an agreement cannot be entered in to between two offices working under President of India. He has suggested that maximum, an MOU can be signed between two such offices.
- MOU with CSC- as informed by CSC, UIDAI is insisting that the Commission has to sign a separate MOU with CSC for purpose of authentication of Adhaar data.
- Methodology to share the data – UIDAI has not supplied fully the web API which allows access to Adhaar data base through NVSP portal. This application is required for EROs to carry out seeding of Adhaar number in electoral data base.
- Biometrics for overseas Indian electors – the issue was discussed on 19.05.2015 in the meeting of the Committee on e-voting. As Adhaar is not issued to the overseas Indian electors, their biometrics have to be collected separately. It is for discussion whether UIDAI can take up the task of collection of biometrics of overseas Indian electors.

Issues where RGI support needed

- Poor enrolment in NPR States.
- Insufficient manpower.and equipments to agencies engaged by RGI.
- Non-issue of BME receipts and delay in distribution of Aadhaar due to incomplete address.
- Delay in supply of data to CEOs

Issues where BSNL support needed

- Poor network in North Eastern States.
- ECI – NET – a proposal for development of ECI NET on pattern of NIC NET/RAILTEL is under consideration. It is for discussion as to how BSNL can assist in development of ECI NET.

Other Concerns

- Besides, general concerns about less enrolment, poor net connectivity and adverse weather conditions, specific issues raised by respective CEOs.

Arunachal Pradesh

- BME has not started in 2 districts.
- BME work has been suspended temporarily in Upper Subansiri and Lower Subansiri districts.
- Vendors are very slow.
- Manpower and equipments are not sufficient.
- Frequent stoppage of BME work due to irregularity in payment of wages/salary to the operators by the vendors.
- The permanent centers have not yet been established.
- Atleast one permanent BME centre needs to be opened in each of the AERO Hqs and ERO Hqs.
- Many Aadhaar cards are getting piled up in post offices due to incomplete address.
- Non issue of BME receipts has aggravated this and the net result is delay in collection of Aadhaar Nos.

Assam

- The Aadhaar Number collection work will start in Assam after publication of National Register of Citizens.
- "Draft National Register of Citizens" will be published in January, 2016.
- The Aadhaar number seeding work may be taken up after January, 2016 with full force, in parallel with BME collection process under NPR.
- Presently, on pilot basis Aadhaar number generation work under NPR is going on in the Districts of Sonitpur (Tezpur), Nagaon and Golaghat. In these districts DEOs have been instructed to collect EPIC number in KYR form at BM collection centre of all such persons whose names appear in Electoral Rolls.
- Total number of Aadhaar issued in the state is 1,48,349 only.
- CEO office is not receiving information on progress of EPIC data collected during BME collection process from RGI.

Manipur

- Coverage/capturing of BME is very slow because very less number of BME teams (only one BME team for 7 (Seven) Assembly Constituencies).
- Need of having more number of mobile BME teams in hill districts.
- Capturing BME is entrusted to 2(two) agencies MANITRON AND INMEDIA. Progress in BME coverage in districts entrusted to INMEDIA is very poor. People have complained that INMEDIA officials are not easily available in the field.
- In some cases, the number given in the Aadhaar card does not tally with the number reflected in the RGI data.
- Necessary action to ensure timely distribution of the Aadhaar cards generated to the public so that public may submit their Aadhaar No. in time for feeding and seeding.
- C-DAC may be requested to make the data entered through NVSP available to the State for cross checking.
- Updated RGI data in respect of Manipur may be made available to the State for feeding and seeding Aadhaar No.

Meghalaya

- Biometric enrolment conducted from 20.06.2013 in 3 out of 27 wards of Shillong Municipality but process was discontinued on 25.07.2013 due to opposition from some NGOs/social organizations.
- Enrolment of about 9000 persons out of 16000 could be made during the period.
- Law and order situation in Garo Hills and Prevailing weather conditions may cause obstructions in field exercise.
- First level intensive campaign planned from 15th June, 2015 to 30th November, 2015.

Mizoram

- Slow pace of Aadhaar registration
- Delay in sending of Aadhaar cards to the applicants.
- Aadhaar registration in Mizoram is not up to the mark.
- So many errors in Aadhaar cards.

Nagaland

- Unstable net connection in most of the districts.
- Shortage of manpower.
- No DIO posted in Zunheboto district since 2013.

Odisha

- Additional Permanent Enrolment Centres (PECs) are required especially in the districts (of Khurdha, Nuapada, Koraput, Sundargarh, Keonjhar, Balasore, Bhadrak, Rayagada and Kandhamal), where the enrolment is less.
- Necessary timely action is to be taken for correction of Aadhaar cards by 30th June, 2015.

10

Tamilnadu

- 522 numbers of PECs run by BEL are grossly insufficient to handle the task on hand. UIDAI may assist in upgrading the infrastructure to capture bio-metrics by making a little investment.
- The contract period of BEL is going to end in November, 2015. Therefore, either RGI may appoint TNeGA & TACTV as their System Integrator to capture biometrics or UIDAI may give the enrolment agency status to TNeGA & TACTV.
- To facilitate easy retrieval of NPR demographic data of any citizen at any PEC, online availability of NPR database and connectivity may be given to all PECs.
- RGI to take a decision in this regard to establish real-time connectivity to avoid duplication and also to permit TNeGA and TACTV in capturing of bio-metrics. Online connectivity will reduce the lead time in transfer of biometric data from PECs to NPR server.

West Bengal

- After repeated persuasion, only in last week they have received the data from RGI.
- The data contains the fields namely; (i) TIN, (ii) Full name, (iii) Gender, (iv) Date of Birth, (v) Father's name, (vi) Mother's Name, (vii) Address line 1, (viii) Address line 2, (ix) Address line 3, (x) Address line 4, (xi) Address line 5, (xii) Pin code, (xiii) UID and (xiv) EPIC No only. The data does not contain the Enumeration Block (EB) code. Without the EB, its not possible to correlate with the Block and Polling Station.
- The agency engaged for collection of Aadhaar number at the district level does have the EB wise complete Aadhaar database. (1 EB = contains around 250 household, which is >= one Polling Stations).
- EPIC data is only 11.46% in total record.

THANK YOU

13.	Vijay S Madan DG MD, UIDAI	9971093366	

Draft Minutes of the Meeting **304**

Subject: - The Comission's meeting on NERPAP – 21.05.2015

A meeting held by the Commission on 21/05/2015 at 11.00 AM in Room no 601, Nirvachan Sadan, New Delhi to discuss "Issues and Challenges in Linking Aadhaar with ER Data in UIDAI and NPR States".

2.   The followings were also present during the meeting:

    i.   Sh. Vijay S. Madan, DG,UIDAI,
    ii.   Sh. S.K.Chakraborti, Addl.RGCR, RGI,
    iii.   Prof. Rajat Moona, DG,C-DAC
    iv.   Sh. N.K. Mehta,ED(CA),BSNL.
    v.   Smt. Rama Nangpal, DDG,NIC
    vi.   Sh. Dinesh Tyagi, CEO, CSC

3.   From the Commission's side, DEC (VZ), DEC (ST), DEC (US), Dir(IT) and Secy(NNB) attended the meeting. Besides, CEOs of Arunachal Pradesh, Meghalaya, Odisha, Tamilnadu and West Bengal also participated in the meeting.

4.   Agenda of the meeting was as under:

1. Issues related to **UIDAI** –
    a) Agreement – an agreement has been signed between UIDAI and Election Commission. That agreement has been submitted on file, in which LA(SKM) has pointed out that an agreement cannot be entered in to between two offices working under President of India. He has suggested that maximum, an MOU can be signed between two such offices.
    b) MOU with CSC- as informed by CSC, UIDAI is insisting that the Commission has to sign a separate MOU with CSC for purpose of authentication of Adhaar data.
    c) Methodology to share the data – UIDAI has not supplied fully the web API which allows access to Adhaar data base through NVSP portal. This application is required for EROs to carry out seeding of Adhaar number in electoral data base.
    d) Biometrics for overseas Indian electors – the issue was discussed on 19.05.2015 in the meeting of the Committee on e-voting. As Adhaar is not issued to the overseas Indian electors, their biometrics have to be collected separately. It is for discussion whether UIDAI can take up the task of collection of biometrics of overseas Indian electors.

2. Issues related with **RGI** –
    a) Poor enrolment in NPR States.
    b) Insufficient manpower and equipments to agencies engaged by RGI.
    c) Non-issue of BME receipts and delay in distribution of Adhaar due to incomplete address.
    e) Delay in supply of data to CEOs

3. Issues related to **BSNL** –
    a) Poor network in North Eastern States.

b) ECI – NET – a proposal for development of ECI NET on pattern of NIC NET/RAILTEL is under consideration. It is for discussion as to how BSNL can assist in development of ECI NET.

5.   DEC(US) made a brief presentation on related concerns with UIDAI, RGI, BSNL and C-DAC as per the above agenda.

6.   The main points of discussion were as follows:

- As regards Web API, DG UIDAI and DG C-DAC indicated that there is considerable progress in the development of this Web API for DSDV services.This is being closely monitored and tested by teams from C-DAC and UIDAI. It was mentioned that it's a matter of 3 to 4 days within which this service will be made available to EROs for seeding purpose.

- For AUA and KUA agreement, LA(SKM) intimated that he would discuss this matter separately with DG UIDAI and sort it out.

- Regarding MOU with CSC, to was mentioned that the issue would be seen again in the light of signing of AUA with UIDAI. However ECI and CSC could draft MoU which may cover other aspects as well to cover many services envisaged by ECI in providing services to the Citizen of India.

- As regards issues relating to RGI, the RGI representative mentioned that except for Meghalaya and Assam where enrolment has just started few months before, other NPR states and UTs are having no issues as such. He informed that infact RGI has already provided RGI Data base with Aadhaar number, enrolment number and TIN number to States who requested for the data. CEOs of Tmilnadu and West Bengal confirmed that they have received the data from RGI.

- CEO, West Bengal indicated that although as intimated by RGI, Aadhaar coverage for the State is above 80 % while on the basis of data collected by BLOs through house to house visits it comes around 30%. It appears that letters are stuck in Post offices either because of incomplete addresses or for some other reasons.

- CEO, West Bengal requested to RGI to provide enumeration block number attached to the records in data base, which would help them to get the part wise data (since parts are almost matching with the enumeration blocks) and it would be easier to manage collection, feeding and seeding of Aadhaar number by respective BLOs and EROs. Sh. Chakraborti informed that TIN number already provided with the records contain enumeration block numbers. He further assured that all issues would be looked into and sorted out as soon as the same are brought to notice of RGI by the concerned CEOs.

- EC(J) directed the CEOs to approach RGI immediately in case they have any specific requests.

- DDG, BSNL indicated that he would look into network issues in North Eastern States and also provide necessary support for routine maintenance. He mentioned that the power problem in North Eastern States is the major reason for communication failure. On the mention of Optical Fiber Project of DoT by DG C-DAC, he indicated that the project is still under process and being a long term project may not help NERPAP.

- CEO, Arunachal Pradesh pointed that that the network connectivity within the state is very poor and BSNL should look into that. He expected RGI to

provide the registration data so that it could be used by BLOs during door to door survey. Sh. Chakraborti agreed to this request. He mentioned that all other CEOs may also send their request directly to RGI and the data would be made available though concerned CPSUs.

- CEO, Meghalaya mentioned that the request to RGI has been already sent for the data. The registration for Aadhaar was started in Shillong and because of NGOs objections there was not much of the progress. But since the launch of NERPAP, people wish to get registered for Aadhaar so that they could submit the aadhaar number to Election office. Now the progress has been seen not only in and around Shillong but also all over the state including rural areas.

- CEC pointed out that various representations/complaints have been received in the Commission suspecting that a number of deletions of names of voters from the Electoral Rolls by the BLOs may take on the basis of non-furnishing of Aadhaar number by the voters. It has also been brought to notice of the Commission that SMSs are being sent that EPIC cards will no longer be needed at the time of voting and that the Aadhaar database may be misused. CEC directed that though necessary instructions have already been issued by the Commission, to avoid confusion, more detailed and clear instructions should go to CEOs that furnishing of Aadhaar by an elector is not mandatory but it is optional. Non furnishing of Aadhaar number will not be a ground for rejection of application for new enrolment / deletion of an existing name from the Electoral roll. The citizens should be sensitized that the electors have been requested to give this information in their own interest and to ensure defect free Electoral Roll, and for incorporation of correct data of electors in the rolls to avoid duplicity and fake entries in the Electoral Rolls.

- As regards putting adequate safeguards to secure Adhaar database, CEC further directed to send instructions to the CEOs to ensure that Aadhaar database is not misused under any condition. He asked to inform them that collection of Aadhaar number is only for the purpose of authentication of details of electors and confidentiality and security of data must be ensured during the process of feeding and seeding. Aadhaar number of an elector shall not be displayed / reflected in electoral roll or EPIC or voter slips or shown in digitized form on website for public scrutiny or other document of the Commission, shareable with public or put in public domain.

7.   The meeting ended with thanks to the chair.

DATA SHARING POLICY

UIDAI embarked on a multi-Registrar model for enrolling the residents with the intent to have the reach and ability to enrol the residents at a reasonable pace.

Registrars are entities who, in the normal course of their activities, deal with residents in the delivery of benefits and services to them. The Registrars carried out enrolments under the aadhaar project through Enrolment Agencies appointed by them. These Registrars already have data bases and collect data from their customers/beneficiaries for discharging the responsibilities cast up on them under various policies, statutes or rules. The Registrars partnered with the UIDAI to avail the opportunity of cleansing their data bases through fresh enrolments of residents in accordance with the UIDAI processes.

In some States where the non-State Registrars were active, State Registrars are facing problems in leveraging aadhaar for delivery of benefits (which is the basic intent of aadhaar project) since data of residents of the State enrolled by the non-State Registrars was not available to the State Registrars. Many State Registrars have had reservations about the involvement of Non State Registrars in the enrolment exercise in absence of any clarity as to how they would be able to access the data of residents enrolled by Non State Registrars. The Enrolment Refresh Committee had also mentioned about the need of sharing of data with such Registrars.

In such a scenario, a policy on data sharing policy assumes an important dimension; wherein on one side, there are concerns regarding privacy, data protection, data security, etc, and on the other hand, there is demand from various State Registrars for the data to enable them leverage the UID for improving the services.

With the above in consideration, it has been decided that UIDAI would share the Resident data, subject to the following conditions:

1. UIDAI would share the data only in such cases where the resident has given the consent for sharing data.
2. The data will be UID generated processed data.
3. The data will be shared on receipt of a formal request from the State concerned. The request will explicitly include the purpose for which the data is required and specific data requirements.
4. States may request data pertaining to their own state only. The data shared will be based on state specified in the resident address.
5. The selective data in specific format, as defined by UIDAI, will be shared as per the validity of the request in a secured manner using appropriate offline and/or online mechanisms.
6. The data would be shared with State Registrars only for the purpose of improvement of delivery of welfare and public services, it also being the intent behind the aadhaar project and the purpose for which the consent has been given by the resident at the time of enrolment.

Data Protection and Security Guidelines for Registrars

1. Background

This document lays down the data protection and security guidelines to be followed by Registrars of the Unique Identification Authority of India (UIDAI). Since the Aadhaar enrolment process and the enrolment for the services of the Registrar is common, it is essential to define the parameters of responsibility of UIDAI and the Registrars.

There are two components to the enrolment process:

a) **Enrolment for Aadhaar** – for which the resident provides their name, date of birth, gender, address and other optional fields such as mobile number , e-mail etc along with biometrics, namely, Photograph, 10 Finger prints and Iris. UIDAI will be responsible for safe custody of the information collected for the purpose of Aadhaar generation once it reaches CIDR.

b) **Enrolment for the Registrars services** – In addition to the information being collected by UIDAI, the Registrars may also be collecting a wide range of information together with biometrics and the Aadhaar number in order to deliver their services to the residents. This information could be viewed as personal information. Hence, ensuring the confidentiality and security of this data is of great importance.

2. UIDAI responsibility for - data protection and security

UIDAI is capturing biometrics and demographics information to issue Aadhaar numbers to the residents and to authenticate the identity of an Aadhaar number holder. It is the responsibility of UIDAI to ensure safety and security of the data collected for Aadhaar enrolment. The data captured (demographic and biometric) shall at the point of collection be encrypted and transported to the Central Identities Data Repository where the UIDAI will decrypt the data in a secure location and use it for the purpose of de-duplication and subsequently for authentication. UIDAI will have a security policy in place which will detail and define the security protocols and access protocols to ensure safety of the data. It is the responsibility of the UIDAI to ensure the safety, security and confidentiality of the data from the point of receipt and in the CIDR and to protect the data from unauthorised access and misuse.

3. Registrars responsibility for – data protection and security

- Security protocols should be in place from the point of collection, transmission of data and to the final destination/ facility where the data will be stored.
- Data must be housed in a secure facility with appropriate access controls and audit trails.
- Appropriate technical and organisational measures shall be taken against unauthorised or unlawful collection and processing of data and against accidental loss or destruction of, or damage to data.

e) <u>Data retention policy</u>

- Registrars must define the time period for which data is being collected and will be retained by them. Data should not be retained for longer than the purpose for which it was meant to be used.
- Data must not be made available for the use of or be retained by third party service providers such as enrolling agencies or by any other unauthorised personnel.
- Registrars must develop their own guidelines for preservation and destruction of data and records according to their functional needs.

4. Security framework for Biometric data

While the above broad guidelines are applicable for all forms of data collected from the residents, special care needs to be taken to address the security of biometric information. Biometrics is unique to an individual and therefore is sensitive information that needs to be protected with the highest standard of care to thwart any possibility of misuse.

The biometric data will be encrypted immediately upon capture during the enrolment process. The data packet will be encrypted with the Registrars key. The Registrar is responsible for the secure transmission of the data and for storing the data at a secure location protected from unauthorised access and misuse. The Registrar is liable to the resident and the public at large for safety, security and proper use of the Biometric data collected by it. The following guidelines are prescribed for the Registrars for security protocols relating to biometric information of the residents.

4.1 Guidelines

1. Registrars should inform residents what biometric data is being collected and how the data will be used.

2. Develop data use and retention policies - Registrars should not collect and retain more data than they need for their purpose (if they want to issue cards

	computer access
	Restrict physical access to resident data
Build and Maintain a Secure Network	Install and maintain a firewall configuration to protect resident data
	Do not use vendor-supplied defaults for system passwords and other security parameters
Regularly Monitor and Test Networks	Track and monitor all access to network resources and resident data
	Regularly test security systems and processes
Protect Resident Data	Protect stored resident data
	Encrypt transmission of resident data across open, public networks

Maintain an Information Security Policy
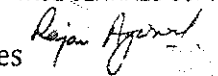

Registrars must create and maintain an information security policy, which addresses the security requirements arising out as a result of their functional/ business needs and objectives. The objectives of this security policy are to:

- Provide management direction and support for information·security.
- Provide a baseline for information security. Partner will have the flexibility to modify components of the operational framework to take into account specific business objectives and security requirements.
- Ensure appropriate safeguards and procedures are adopted to protect information and associated information technology resources
- Ensure that persons handling information are aware of their accountability and responsibilities

This policy shall be implemented through a process approach, based on the PDCA (Plan, Do, Check, Act) as follows. Sample Policies and Procedures followed by other organizations are listed in the annexure.

- **Plan**
  Establish a security policy, objectives, targets, processes and procedures relevant to managing risk, and information security to deliver results in accordance with the Partner's overall policies and objectives
- **Do**
  Implement and operate the security policy, control processes and procedures.
- **Check**
  Monitor, and review the Security policy, control processes and procedures

Once a secure network is established, it must be regularly monitored, and steps must be taken to keep it up-to -date for all security issues. Some possible mechanisms to ensure this include:

- Track and monitor all access to network resources and resident data
- Regularly test security systems and processes
- Regular security audits, and penetration tests for all systems, networks, and processes will help to keep security up to date with current threats, and ensure that no complacency sets in.

Protect Resident Data

From the resident's perspective, the primary purpose of all security plans is to ensure that the resident's data is not stolen, vandalized, or compromised in any way. To accomplish this, in addition to all the previous steps, the Registrar must classify resident data based on value, and usage. Further, a cryptographic system must be put in place

- Encrypt resident data at rest: i.e. all resident data must be encrypted, while it is stored on external or internal secondary storage.

- Encrypt resident data in motion: i.e. all resident data must be encrypted while it is being transmitted across open public networks (or even closed networks).

- Protect unencrypted data: i.e. while the data is in the host memory, unencrypted, the host system must be protected from malicious activity, including viruses, spyware, etc.

6. Compliance

Compliance can be summarized into 3 stages:
Collecting and storing: Secure collection and tamper-proof storage of all log data so that it is available for analysis.

Reporting: Being able to prove compliance on the spot if audited and present evidence that controls are in place for protecting data.

Monitoring and alerting: Have systems in place such as auto-alerting, to help administrators constantly monitor access and usage of data. Administrators are warned of problems immediately and can rapidly address them. These systems should also extend to the log data itself – there must be proof that log data is being collected and stored.

Compliance can be accessed through the use of an annual onsite data security audits, and quarterly network scans.

Annexure : List of Sample Policies which the Registrars must have in place:

- Information Security & Management Policy
- Information Security Organization Structure Policy
- Risk Assessment Policy & Procedures
- Asset Classification Policy and Procedure
- Asset Classification and control standard
- Information labeling and handling procedure
- Acceptable Use Guideline
- Procedure for control of documents and records
- Human Resources Security Policy and Procedure
- Physical and Environmental Security Policy and Procedure
- Change Management Policy and Procedure
- Third Party Management Policy and Procedure
- Antivirus and Malicious Software Policy and Procedure
- Backup and Restore Policy and Procedure
- Network Security Policy and Procedure (Including internet, intranet, mobile computing, tele-working, firewall security)
- Media Handling Policy and Procedure
- Monitoring Policy and Procedure
- Access Control Policy and Procedure (including password security)
- Network Access Control Policy and Procedure
- Systems Development Maintenance Policy and Procedure
- Incident Management Policy and Procedure
- Business Continuity Management Policy and Procedure
- Cryptographic procedure document
- Minimum Baseline Security Standards

- **Act**
  Take corrective and preventive actions based on audit and review to achieve continuous improvements of the security plan.

Maintain a Vulnerability Management Program

Registrars must formulate risk assessment policies, and procedures. As a part of this, all assets must be listed, threats & vulnerabilities identified, and assessed, and mitigation plan implemented for all threats. As a result of this, all vulnerable and high risk components would be identified, and protected. Some specific recommendations that may come out of such an exercise include:

- Use and regularly update anti-virus software on all systems commonly affected by malware. This includes all anti-spyware, anti-virus, and other host protection systems.
- Develop and maintain secure systems and applications. This includes the adoption of a secure software development life cycle.

Implement Strong Access Control Measures

Registrars must identify all information assets, and how they are used in their system. This must be followed by the following actions:

- Restrict access to resident data by business need-to-know
- Assign a unique ID to each person with computer access
- Restrict physical access to resident data

Access control must include physical, host (computer), and network security.

Build and Maintain a Secure Network

It is essential that a secure network be established to protect the system from attack, and misuse. Some sample guidelines for securing this network include:

- Install and maintain a firewall configuration to protect resident data. A firewall is required to prevent external, potentially malicious intruders from accessing the network, and the resources within.
- Do not use vendor-supplied defaults for system passwords and other security parameters. A commonly ignored aspect of security is that various systems come with default security parameters including passwords. Having them set to default values would allow intruders to access the network, and steal data / inflict damage.

Regularly Monitor and Test Networks

and store finger print they should retain that data only and not the rest). Information that is not required must not be retained by them.

3. Registrars should develop data security policies and build up systems to ensure safe keeping of biometric data, protect from malware, spyware and hacking of systems, including access protocols, etc. For this purpose :

   - Registrars must have a physically secure location (data centre) where the biometric data can be housed, with strict security protocols and protection from unauthorised access. Physical, network and application security must be taken care of.
   - Biometric Data should always be stored in encrypted form. Data should not lie unencrypted at rest.
   - Biometric Data should not be decrypted except for the time when it is being used.
   - Only data that is required should be retained and the rest should be destroyed.
   - Key management systems with logging and audit trails should be created preferably using a Hardware Security Module (HSM).
   - Independent audit of the security facilities, processes and policies should be done periodically and reports should be published to assure the public of the safety standards being followed.

4. Biometric data should not be made available to or be retained by enrolling agencies, at user points or by any other unauthorised personnel.

5. Key technical safeguards

Overall objective

To ensure that all UIDAI Registrars meet a minimum level of security when they store, process and transmit resident data the UIDAI has prescribed following control objectives and recommendations to meet them :

Control Objectives	UIDAI Recommendations
Maintain an Information Security Policy	Maintain a policy that addresses information security
Maintain a Vulnerability Management Program	Use and regularly update anti-virus software on all systems commonly affected by malware
	Develop and maintain secure systems and applications
Implement Strong Access Control Measures	Restrict access to resident data by business need-to-know
	Assign a unique ID to each person with

The Aadhaar enrolments will be done through the Registrars. The Registrars will also be collecting additional data from the resident in order to deliver their services to the resident. This relationship between the resident and the Registrar is independent of the UIDAI. As a consequence Registrars have a fiduciary responsibility and has to exercise a duty of care to secure and protect all the data (demographic and biometric) collected from the resident. UIDAI prescribes the following broad measures for data protection and security to be adopted by Registrars:

a) <u>Care in collection</u>:
   - Registrars shall take all necessary precautions, in respect of information received or collected by it so as to ensure such information is properly and accurately recorded, collated and processed;

b) <u>Process for access and updating</u>:

   - Registrars shall also establish and adopt procedures to disclose to a person, upon their request, their own information – subject to satisfactory identification (in order to ensure that information is not revealed to third parties)

c) <u>Principles and procedures relating to data collection, use and processing</u>

   - Registrars must collect information from residents only for the purpose related to their functions.
   - The individual from whom data is being collected should be informed of the purpose for which information is being collected and how the data will be used.
   - Registrars should obtain appropriate and clear legal consent from the resident.
   - Registrars must ensure that data collected and maintained by them is protected against any loss, or unauthorized access, or use, or modification or disclosure.
   - Data provided by the resident to a Registrar should be used by the Registrar for the purpose envisaged. Resident must be made aware of any data sharing policies of the Registrar. While some form of sharing maybe part of the governance framework of governments – residents must be made aware of the same. Any other sharing beyond the governance framework must only be done with the explicit consent of the resident and for the explicit reason for which the consent is given.

d) <u>Data security protocols</u>

Version 1.1

7. Demographic data may be shared with Financial Institutions (Banks, etc) for opening of Bank accounts and/or linking the accounts with aadhaar, as consented by the resident at the time of enrolment or subsequently.

8. Data may also be shared as warranted under any Act/ Statute/ Regulation of Govt of India and/or any Cabinet Decision in this regard.

9. State Registrars may use the shared data with their various departments for the purpose of improving delivery of their welfare and public services but the Nodal Department shall be responsible for ensuring Security compliance.

10. The Registrar packet will not be generated, if Registrar does not ask for it.

11. UIDAI may also consider enabling electronic KYC mechanism where an authorized entity can send a request to UIDAI to share demographic data and photo for a specific resident, in the long run. This mechanism will require the said entity to send resident data sharing consent along with resident authentication factor (biometric/OTP). UIDAI will share data after successful resident authentication. UIDAI will define set of authorized entities who will be allowed to avail this service, at the appropriate time.

12. Updates should be allowed to flow to agencies with whom UIDAI shared the data initially as per resident consent from time to time.

13. The necessary framework and institutional safeguards as per the IT Act 2000 and all guidelines/rules/enactments of the Government of India for ensuring the data safety and security at all times would be put in place by concerned Registrar before sharing of any data. Registrar will sign a *"Data protection and Understanding of holding sensitive data"* agreement with UIDAI. Among other things, the Agreement will include various required compliances for the following security guidelines and any other security guidelines as the UIDAI may deem fit:-

    a. Strategic control of the data shall always remain with the Registrar who shall be responsible for the overall security and proper use of the data at all times.

    b. Data shall be stored and transmitted in encrypted form.

    c. Biometric data shall not be decrypted except for the time when it is being used. Under no circumstances, the biometric data of a resident shall be sent as part of any response to any verification request.

    d. Registrar shall have a physically secure location to store /house the shared data, with strict security protocols and protection from unauthorised access. The facility should have appropriate access control and audit trails.

    e. Physical, Network and Application level security for the software that uses this data shall be ensured.

    f. State Registrar shall remove the biometric data if "resident" moves out of the state and informs the state.

    g. The data should not be retained beyond the duration necessary to serve the purpose for which it was meant to be used.

    h. Failure to comply with any of above obligation shall be deemed a serious breach by the Registrar concerned with whom data was shared by UIDAI and the said Registrar shall destroy the shared data within the time specified by UIDAI, without prejudice to any damages, which UIDAI may seek.

UPON hearing counsel the Court made the following
O R D E R

Issue notice in W.P.(C) No. 829/2013.

Application for deletion of the name of petitioner no. 1 in
T.P.(C) Nos. 47 of 2013 is allowed.

T.P.(C)nos. 47-48 of 2013 and T.P.(C) No. 476 of 2013 are
allowed in terms of the signed order.

All the matters require to be heard finally. List all
matters for final hearing after the Constitution Bench is over.

In the meanwhile, no person should suffer for not getting
the Adhaar card inspite of the fact that some authority had issued
a circular making it mandatory and when any person applies to get
the Adhaar Card voluntarily, it may be checked whether that person
is entitled for it under the law and it should not be given to any
illegal immigrant.

UPON hearing the counsel the Court made the following
ORDER

The matters require considerable time for hearing. Therefore, we direct the matters to be listed for hearing in the second week of July, 2015 after obtaining appropriate orders from Hon'ble the Chief Justice of India.

In the meanwhile, it is brought to our notice that in certain quarters, Aadhar identification is being insisted upon by the various authorities, we do not propose to go into the specific instances.

329

Since Union of India is represented by learend Solicitor General and all the States are represented through their respective counsel, we expect that both the Union of India and States and all their functionaries should adhere to the Order passed by this Court on 23rd September, 2013.

Pleadings be completed before the end of April, 2015.

All the parties are at liberty to file any further affidavit or documents, if they so wish.

Election Commission of India

D.O. No.23/1/2015-ERS (NERPAP) Vol. I /5/2
Dated: 30 June, 2015

Dear Sir,,

Kindly recall the meeting held by the Election Commission on 21st May, 2015 to discuss 'Issues and Challenges in Linking Aadhaar with ER Data in UIDAI and NPR States'. One of the issues related to UIDAI discussed in the meeting was Agreement signed between UIDAI and Election Commission. After the meeting, the matter was further discussed in the Commission. It was pointed out to the Commission that the Supreme Court had directed on 24th March, 2014 that the Aadhaar data collected by UIDAI would not be transferred to any other agency without the consent, in writing, of the person concerned. It was felt that the matter needed to be clarified by UIDAI that by allowing access to the database of the UIDAI to the Election Commission there was due compliance with the Supreme Court's aforesaid order. The Commission has therefore desired that a copy of UIDAI's instructions on sharing of biometric information may be obtained from UIDAI.

May I request your good self to look into the matter and direct the UIDAI officials to furnish the said policy document/instructions on sharing of biometric data to the Commission immediately.

With Regards,

Yours sincerely,

(Umesh Sinha)

Shri Vijay S. Madan,

Subject: - National Electoral Roll purification and Authentication Programme (NERPAP)-seeding of Aadhaar number with EPIC data base-review meeting-follow up actions-regarding.

Sir,

Please refer to your letter on the subject matter wherein it has been requested to mandatorily collect the EPIC number of the 18+ resident while their Aadhaar enrolment. In this regard, the instructions has already been given to UIDAI registrars/EAs and UIDAI regional offices to conduct pilot at few locations for collecting EPIC number at the time of enrolment wherever, the same is available with the resident. The outcome of the pilot is expected by next week which will enable UIDAI to take final decision on the matter. UIDAI shall give progress made in this regard shortly.

Yours Faithfully,

D.O. No. 9/69/2010-CRD(NPR)

Dear Shri Srivastava,

I am directed to refer to your letter no. 23/1/2015-ERS/283 dated March 16, 2015 regarding the review meeting of seeding of Aadhaar number with EPIC database under National Electoral Roll Purification and Authentication Programme (NERPAP).

2.   On the queries raised by the CEOs during the VC, the replies are as under:

   i.   As canvassing of NPR schedule has already been completed in 2010 and that EPIC number was not a part of NPR items of information, the same can not be collected now. However, in KYR+ Form, a specific column for collection of EPIC number exists. Instructions could have been issued by the ECI for making it compulsory for everybody to provide EPIC number in KYR + forms. But as the collection of EPIC was voluntary, the number of EPIC numbers collected are not high.

   ii.   The EPIC numbers collected through the KYR+ forms at the time of biometric enrolment under NPR, shall be shared with the CEOs of the States of Gujarat, Uttar pradesh and West Bengal.

With regards,

Yours sincerely,

Dear Shri Srivastava,

I am directed to refer to your letter no. 23/1/2015-ERS/283 dated March 16,

335/H

2015 regarding the review meeting of seeding of Aadhaar number with EPIC database under National Electoral Roll Purification and Authentication Programme (NERPAP).

2. On the queries raised by the CEOs during the VC, the replies are as under:

i. As canvassing of NPR schedule has already been completed in 2010 and that EPIC number was not a part of NPR items of information, the same can not be collected now. However, in KYR+ Form, a specific column for collection of EPIC number exists. Instructions could have been issued by the ECI for making it compulsory for everybody to provide EPIC number in KYR + forms. But as the collection of EPIC was voluntary, the number of EPIC numbers collected are not high.

ii. The EPIC numbers collected through the KYR+ forms at the time of biometric enrolment under NPR, shall be shared with the CEOs of the States of Gujarat, Uttar pradesh and West Bengal.

With regards,

Yours sincerely,

(S.K. Chakrabarti)

D.O. Letter No.CEO /01/21042015 Dated: 21.04.2015

Respected Sir,

Sub: NERPAP– Implementation Status – New initiatives in
Tamil Nadu – Information sent – Reg.

***

National Electoral Roll Purification and Authentication Programme
(NERPAP) has been launched in Tamil Nadu from 3rd March 2015 and
sensitisation of stakeholders, **360°** publicity for awareness creation and
training & capacity building of election staff have been completed. First
Special Camp was successfully conducted on 12th April and subsequent
special camps have been planned on 26th April, 10th May and 24th May
2015. Presently door-to-door visit by Booth Level Officers (BLOs) is in
progress for collecting electors' Aadhaar/contact information and
verifying correctness of electoral roll entries in prescribed format. In
Pollachi AC with Commission's permission, an Intelligent Character
Recognition (ICR) format is being used.

As on date, out of **562 Lakh** electorates in Tamil Nadu, over **280
Lakh** (50%) electors' information has been collected and about **164
Lakh** (30%) electors Aadhaar number/ contact information feeding has
been completed. Pollachi AC, armed with ICR format has finished 100%
data collection and capturing of entries of all 2,11,503 electors, and is
ready to finish the seeding by 25th April 2015. To hasten the seeding,
Pilot to seed the Aadhaar using NPR data obtained from Registrar
General of Census is under implementation in selected ACs in
Dharmapuri, Tiruvallur and Coimbatore Districts. The protocol being
adopted is-"_100% pre-seeding by Supervisor along with the BLOs,
system based random pre-seeded entries verification@ 4% each by two
AEROs and finally 2% random pre-verified entries acceptance by ERO_"

I request approval of the commission to adopt this seeding protocol.

the whole state. NPR-TIN number linking for non-Aadhaar electors will be done once Aadhaar seeding and the corrections in electoral rolls is completed. As on date about 5.9 Lakh claims have been received and EROs are attempting to dispose these claims within 15 days time limit prescribed by the Commission.

I thank the Commission for permitting IT infrastructure system upgradation in the state and permission to take-up GIS tablet based Pilot project for - "On the spot electoral roll updation, Aadhaar/ contact details collection & feeding with bio-metric data captured for seeding and Geo-tagging of the electors" for participatory rationalisation of part boundaries in Gummidipoondi AC of Tiruvallur District using *Decision Supporting System*, conceived by us and programme is developed by Bharathidasan University, Tiruchirapally. This will go a long way to improve the voters participation in Tamil Nadu elections by *'minimising the average travel distance'* for the electors to the polling station.

I take this opportunity to convey my warm congratulations to you on assuming the charge as Chief Election Commissioner of India and request you to kindly make a visit to Tamil Nadu. I take the liberty of suggesting 10th May 2015 for your visit when third special camp under NERPAP will be conducted throughout the state.

with warm regards

Yours sincerely,

(signature) Sandeep

E-mail : ceo_tamilnadu@eci.gov.in

Dated : 20/05/2015

Respected Sir,
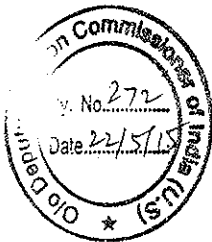

Sub: NERPAP progress - Seeding training imparted- Regarding.

*****
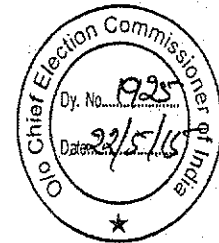

I wish to inform you that National Electoral Roll Purification and Authentication Programme (NERPAP) is being very successfully implemented in Tamil Nadu. As on 19th May 2015, out of **5.62 Crore electors** in the state, Aadhaar nos., contact details, and claims forms, where required, have been collected from **5.47 Crores (97.31%)** electors and out of 32 districts, DEOs for following 27 districts have reported 100% completion of data collection in NERPAP format while feeding for **4.62 Crores (82.1%)** electors have been completed. 13 districts have completed feeding of more than 90% electors' data. District-wise progress report on 19th May is enclosed in Annexure.

As informed in my earlier letters and was permitted, CEO, Tamil Nadu office has developed a module for Aadhaar seeding in Electoral Roll with protocol of -"*100% electors' data pre-seeding by Supervisors in the presence of BLOs, which is verified for 4% each randomly system selected supervisor pre-seeded entries by two AEROs and final seeding by ERO after checking 2% randomly system selected AERO verified entries*". Training of State and district level master trainers for seeding was conducted at Chennai on 15th May 2015 and training of supervisors, AEROs and EROs at district level would be over this week. Seeding of Aadhaar into electoral Roll would start from 21st May onwards in all the districts following above mentioned protocol. I enclose herewith a copy of the "Handbook on Aadhaar Seeding under NERPAP" printed by CEO, Tamil Nadu for your reference and kind perusal.

With warm regards.

Yours' Sincerely

To
Dr. Nasim Zaidi,
Chief Election Commissioner,
Election Commission of India,

# NATIONAL ELECTORAL ROLL PURIFICATION AND AUTHENTICATION PROGRAMME (NERPAP)

Training Manual on Aadhaar Seeding Protocol for

- Pre-seeding by Supervisors and
- Seeding by AERO's & ERO's

EASY REGISTRATION, EASY CORRECTION

Office of Chief Electoral Officer, Tamil Nadu

NATIONAL ELECTORAL ROLL PURIFICATION AND
AUTHENTICATION PROGRAMME
(NERPAP)

Training Manual on Aadhaar Seeding
Protocol for

- Pre-seeding by Supervisors and
- Seeding by AERO's & ERO's

Table of Contents

1. Introduction

We are all aware that Election Commission of India has launched a comprehensive programme called "**National Electoral Roll Purification and Authentication Programme (NERPAP)**, from 3rd March, 2015 with a clear timeline and well defined goal, with the primary objective of making the electoral rolls totally error free, by having all its details authenticated. The following steps were desired to be taken up for achieving the above objective;

(i)   Linking and authentication of EPIC data of electors with Aadhaar number of UIDAI,

(ii) Encouraging the electors to come forward on their own, to Voluntary disclose multiple entries pertaining to the elector and dispose of such cases within 15 days by the concerned EROs under intimation to the concerned elector.

(iii) Correcting the errors or any relevant entry pertaining to electors in the latest published electoral roll on production of cogent documentary evidence.

(iv) Improving the image quality of an elector wherever is needed for clear identification or wherever it is requested by the elector for updation of image by following the due procedure.

(v) Obtaining the contact details of electors namely- mobile / landline no. and e-mail id, for one to one sharing of electoral services in the future and facilitation of easy registration and easy correction in electoral roll.

1.1   Information Collected

- Aadhaar information – Aadhaar number and name as in Aadhaar

- Contact info – Mobile number, Alternate number and Email ID

- Correction of the ER details – if correction is required, collect information in the requisite format

- Voluntary disclosure of multiple entries

- Improving the health of ER by collecting details relating to Absent, shifted and dead entry details.

1.2   Methodology adopted

To achieve the above objectives of NERPAP, the methodology adopted for collecting the requisite details of the elector includes;

1.2.1 Electors voluntarily furnishing the information - Appeal through various modes of SVEEP initiatives has been made to the electors, seeking their cooperation to come forward on their own and voluntarily furnish the requisite information to facilitate cleansing the Electoral roll and authenticate their details i.e.

355

1.2.3 Data Feeding

- The details collected by the BLO in the NERPAP format are entered into ERMS portal by the data entry operators / staff deployed by the DEO

- The data feeding in ERMS is done though the web service link http://117.239.178.194/ERMS

- The collected data is feed at a centralized location or at various decentralized places, based on the convenience of the BLO's and the supervisors, thereby facilitating simultaneous multiple nodes of data entry.

- Data is being prescreened for the correctness of information and entries requiring correction / additional information are sent back to district to carryout necessary modification.

Data feeding screen
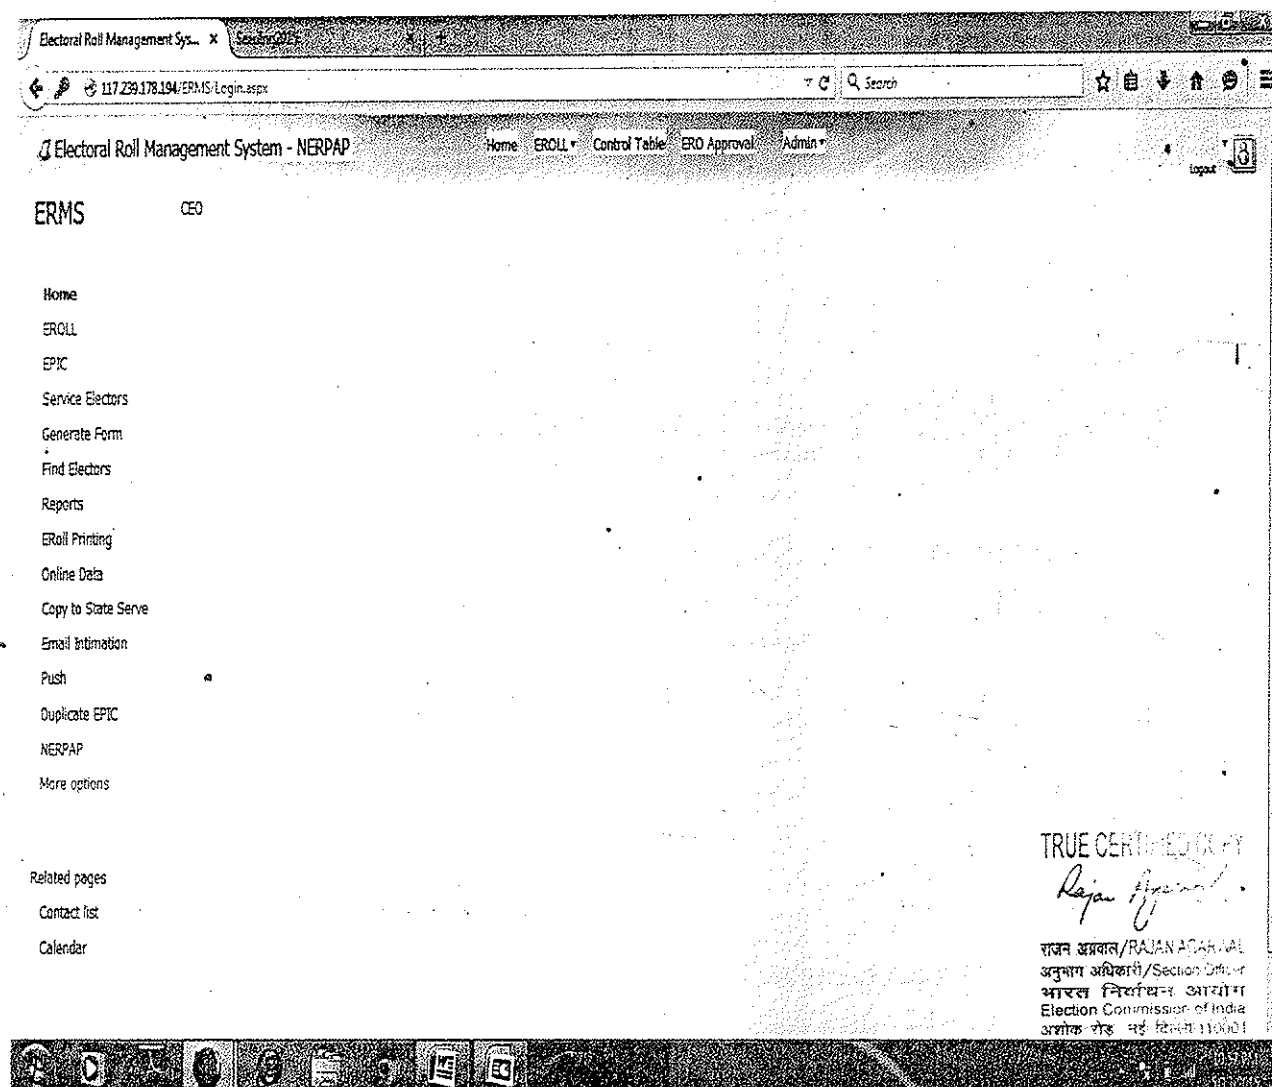

On clicking the Enter Aadhaar and contact details link, the screen displayed is as;

Enter EPIC No: [_____] **GO**

[Edit]

Enter Aadhar No: [_____] [_____] [_____]

Enter EID: [_____]

Enter Name as in Aadhar Card: [_____]

OR

☐ I have other proof
(If Please check this box not Undergone for Aadhar Camp)

Enter Mobile No(Self): [_____]

Enter Alternative Mobile No: (or) Landline No: [_____]

[_____]

Enter Email ID: [_____]

Any Other Inclusion/Deletion in his/her family(Y/N): [N ▾]   ☐ Whether ASD ?

Correction Required(Y/N): [N ▾]

Is Aadhaar issued outside Tamil Nadu(Y/N): [N ▾]

[Submit]

- All details collected from the elector by the BLO is entered with care in the above data feeding screen of the ERMS and submitted

- The details of the data feed into the ERMS can be viewed in the dashboard link using the web link http://117.239.178.194/dashboard/ (The details relating to AC wise, part wise and the type of details like with Aadhaar, without Aadhaar etc can also be viewed as and when required)

After the dedicated efforts put by the District Election Team, within two months of the starting of the NERPAP in Tamil Nadu we were able to achieve the target of **97.31% in data collection and 82.148% in data feeding.** The district wise breakup details are as follows;

| Sl. No.	District	Total Electors	Data collection		Data entry	
			Upto the Day (19 / 05 / 2015)	% of Collection	Upto the Day (19 / 05 / 2015)	% of entry

	Total	56206547	54701791	97.31	46172553	82.148

2.2 List B - The Aadhar Number collected and entered in NERPAP finds place in NPR-Aadhar database, but no other demographic attributes are matching by system comparison. This could be either because the Aadhaar collected is entered wrongly against an elector; or there could be a case where the details of similarity are not captured by the machine, and the human eye is required. These cases are unique and therefore provision for a separate list. [*see the sample B list attached herein*]

2.3 List C - Where NO Aadhar numbers are collected or entered in NERPAP format. These are mostly the cases where the elector may not have been issued with Aadhar, or it has not been shared/captured in NERPAP. These cases will be handled by using EID (that are also captured in TN NERPAP format; additionally, also through Permanent Enrollment centers— PECs) or to look for the Family tree in NPR through TIN No. who do not even have the EID Nos. ONLY LIST A and B WILL APPEAR BEFORE THE PRE-SEEDING SUPERVISOR; AND LIST C WILL HAVE TO WAIT FOR AADHAR TO BE ISSUED TO BE SEEDED. However, EID/TIN family tree will be used to do comprehensive de-duplication of the ER

363

3.1 Process flow

ERO - Seeding

AERO ——— Verification ——— AERO

Supervisors -- Pre-Seeding

| REJECT | ACCEPT | SCHEDULE ENQUIRY |

- Select the Option "Partwise" for Partwise pre-seeding and "EPIC number search" for specific case

- If the "Partwise" option is selected, then select the AC number and Part number as shown in the Screen shot. After selecting it, click the "GO" button. The details will be populated in a Grid

Part wise details display screen;

- The details fed into the NERPAP server for the selected part number will be shown in the Grid as shown

- For Pre-seeding, click the "Seeding" button which will navigate to the next page and shows the details available in ER database, NPR database & Image of AADHAR-EPIC for the selected entry as;

3.3 SEEDING PROCESS FLOW

- Supervisor does the part wise pre-seeding (100%) on web based software assisted by BLO having Aadhaar card copies (if voluntarily given by the elector). Supervisor will have to click on any one option- 'Accept', 'Reject', or 'Schedule' enquiry.

- Each AERO verifies 4% of the total pre-seeded Elector records randomly system generated having minimum one record per part. Options- 'Accept', 'Reject', or 'Schedule' enquiry. Generally two AEROs in an AC, therefore 8% verification at this stage.

- ERO will verify 2% of the supervisor pre-seeded records randomly generated by system for him, covering all parts. Thereby total of 10 % verification of pre-seeded data before any part is seeded.

- Every 'Accept' goes to next level of scrutiny- Supervisor->AERO->ERO

- Every 'Reject' entry goes back for verification to BLO and that part for repeat pre-seeding (100%) by the Supervisor & BLO.

- Every 'Schedule' is verified by the BLO once again and correct entry is made before pre-seeding. Enquiry in presence of BLO and if need be, with the elector concerned shall be conducted only by the AERO/ERO

List A2 - SAMPLE ★★★★

NERPAP Progress Report as on 19/05/2015

- 21 -

The attributes on which comparison is to be made by Supervisor, ERO/AERO are:-

1. Photograph as appearing in Electoral Roll and as in NPR-Aadhaar data

2. Name as in Electoral Roll & NPR Database

3. Relation type & name i.e S/o, D/o, W/o and Relation Name

4. Gender (M/F)

5. Date of Birth/Age

6. Address as in Electoral in & NPR Aadhaar Database.

The Supervisors along with BLOs while pre-seeding each elector data need to take a decision after comparison of above attributes of each electors in the part arranged to them with the help of BLOs that there is only one person with given EPIC & Aadhaar no. in both the databases i.e. Electoral Roll and NPR Aadhaar database.

3.4 Reject in cases

1. None of the attributes matches including the photo

2. In the Photo there is similarity, but no other attribute matches

3.5 Enquiry in cases where

1. Photo similar, names different

2. Relation type same, but relation name is different

3. Gender alone is different, all other attributes are matching

4. Date of birth is not matching

5. Age group not matching, other attributes match

Note : when called for enquiry and correction in Electoral Roll is needed then the requisite forms to be collected from the elector and should be disposed of immediately

3.6 In all other cases go for accepting and seeding, examples are

1. Photo is visually matching and name given in Aadhaar and ER fully or partially matching, gender being the same, DOB /age and address being the same / address being partially matching – it is a case for seeding

2. Photo, Name, Age, Gender are all the same but address doesn't match – case for seeding

ILLUSTRATIONS

Case-1

	Attributes	Electoral Roll data	NPR-Aadhaar data	Possible Solution
1	Photograph	Not Matching		Reject
2	Name	Not Matching		
3	Relation type & name	Not Matching		
4	Gender (M/F)	Not Matching		
5	Date of Birth/Age	Not Matching		
6	Address	Not Matching		

Case-2

	Attributes	Electoral Roll data	NPR-Aadhaar data	Possible Solution
1	Photograph	Matching		Reject
2	Name	Not Matching		
3	Relation type & name	Not Matching		
4	Gender (M/F)	Not Matching		
5	Date of Birth/Age	Not Matching		
6	Address	Not Matching		

Case-3

	Attributes	Electoral Roll data	NPR-Aadhaar data	Possible Solution
1	Photograph	Matching		Schedule Enquiry
2	Name	Not Matching		
3	Relation type & name	Matching		
4	Gender (M/F)	Matching		
5	Date of Birth/Age	Matching		
6	Address	Matching		

Case-4

	Attributes	Electoral Roll data	NPR-Aadhaar data	Possible Solution
1	Photograph	Matching		Schedule Enquiry
2	Name	Matching		
3	Relation type & name	Relation type Matching but Relation Name not matching		
4	Gender (M/F)	Matching		
5	Date of Birth/Age	Matching		
6	Address	Matching
